### Section 7: Handling and Storage

**Precautions for safe handling:**

**Ventilation:** No ventilation requirements

**Advice on general occupational hygiene:** Eating, drinking, and smoking should be prohibited in areas where this material is handled, stored and processed. Wash hands before breaks and at the end of workday. Remove contaminated clothing and protective equipment before entering eating areas.

**Conditions for safe storage:** Store upright at room temperature. To maintain product quality do not store near heat source or in direct sunlight.

**Other Precautions:** Avoid bacterial contamination. Keep containers tightly closed when not in use.

### Section 8: Exposure Controls/Personal Protection

**OSHA Permissible Exposure Limits**

Chemical Name	OSHA PEL	ACGIH TLV (TWA)
-	-	-

The TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equaled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

**Appropriate engineering controls:** Good general ventilation is sufficient to control worker exposure to airborne contaminants.

**Respiratory Protection:** Not applicable under normal conditions

**Skin Protection:** Resistant Plastic or rubber gloves (optional)

**Eye Protection:** Safety glasses or goggles. (optional)
